Carl and his wife were the best price in town by a lot. The service I received was five stars. When I had an issue they were very quick to react and ensured the job was done properly and professionally.

The last company (the area's largest) came every two months for about 3 minutes, and we were paying quite handsomely. A neighbor here in LaCasa had Bug Off Pest and referred them to us. Came and not only did a wall to wall, top to bottom inspection, but treated everywhere and educated us as to what to look for, and hints to prevent any future infestations. Changing companies proved to be a huge case of before and after for us, including economically. It's Bug Off Pest for us from now on!

Carl responded quickly to our call for an inspection of our home after a recent move to south west Florida. Both Carl & Tracey were very efficient and friendly while executing professional work. They were both very aware and concerned for our dog during and after product applications and followed up. Thank you for the service!

I moved to Florida from Delaware last year and tried for months to get the ants under control with every product available to residential buyers. (Note I don't have pets so I even tried poisons.) I had heard neighbors used pest control companies and paid quarterly and I had decided that I would have to also to get rid of those ghost ants in my house. I compared the services and associated cost of local exterminators and did not believe the quotes I received were competitive. Then one my family members said she thought she found mouse droppings in her room and on the porch. The neighbor said it was rat droppings because he had seen river rats across the street on the canal side. Terrified of rodent infestation, I was desperate to find an exterminator; and what was worse is that it is as a Friday late afternoon and I was going out of town for weeks early Monday morning. Fortunately, I saw this company's truck at a business in Punta Gorda. I shared my fears and timing crunch with the company owner and he agreed to come service my house on a Sunday, EVEN THOUGH it was not his company's intention to to serve my county. All the better, I'm glad his company has agreed to continue to serve my residence even though it's a further drive for them because the rates are extremely competitive and a great value for all the services I receive. The good news was that the droppings were from lizards and the owner was honest with me even though I would not have known. He didn't over sell me services I didn't need. Further because of the spraying I have had no more dropping in house. They rid my home of bugs and they do the yard too. Also I like that they are on time with my quarterly schedule and flexible to come early if ants start to reappear. Lastly, they are reliable and honest so I can trust them to service my home if I'm out of town. Very please with service and I will provide letters of recommendation to prospective customers.

Thank you so much for your professional service. It's a big relief to walk into the kitchen and know I will not worry about seeing ants. No worry

I tried several different ways to get rid of the my bug problem thinking it was just regular bugs. I went to the website of the CDBIA to find a local bug exterminator and found Bug Off Pest. Carl and Tracy came out the same day and found beetles in my home. What a shock. They treated them and took samples with them. They also sprayed the outside and gave me some good advice on how to NOT have rats in my attic. Carl has called several times to check on how the beetle situation was going and even came out again when I found a couple in my dogs food. So happy the beetles are gone. Thank You Carl and Tracy.

Carl was the exterminator that can out. Received a call from him. He was very knowledgeable in the service that he provided. He made me feel like I was family. In today's day and age you just don't find that anymore.

I tried to do this own my own. The ants were all over my countertops in my kitchen. I went to the hardware store and bought some products, but they did not work. I looked at websites to see is I could get rid of the ants. I finally gave up and called a business who could help me with this. I reached Bug Off Pest and they helped me with this infestation. They were able to detect other places that needed to be looked at. I am very pleased with their service and would recommend them for all your bug needs.
